

# Pay

## Set Up Checklist

Apple Pay® is a mobile payment and digital wallet service by Apple that allows users to make payments in person, in iOS apps, and on the web. It is supported on the iPhone, Apple Watch, iPad, and Mac.

Here's an overview of what you'll need to enable Apple Pay for EveryAction:

### APPLE PAY®

- 1. Enroll in the Apple Developer Program
- 2. Obtain Approval from Apple Pay for Donations

### PARAGON

- 1. Create a Certificate Signing Request in Paragon
- 2. Upload Certificate Signing Request to Apple Pay
- 3. Generate Payment Processing Certificate from Apple Pay to Upload to Paragon

### EVERYACTION

- 1. Receive Email of Approval from EveryAction
- 2. Generate Certificate Signing Request in EveryAction
- 3. Obtain Merchant Identity Certificate from Apple Pay and then Upload to EveryAction

 Note: You will need to register and verify **every** website domain on which you want to use Apple Pay through your contribution forms.

At this time Apple Pay can only be enabled on forms hosted on vanity URLs or domains outside of Online Actions. You can embed your form on your website's domain, or reach out to your Account Executive about purchasing a vanity URL.

For detailed Instructions navigate to "[EveryAction/NGP Help Docs](#)" in the user dropdown menu at the top right-hand corner of your screen; search for the "[Apple Pay Setup](#)" article in our Online Support Center.
